### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Napoli on 10-25-06.

The application has been amended as follows:

In claim 1, line 6, after the word "particles" insert "of the said compound"

The following is an examiner's statement of reasons for allowance:

Applicants have compared instant claimed composition with the closest prior art teachings and showed that employing the same techniques of tablet preparation i.e., wet granulation or direct compression, the prior art compositions result in either extremely hard or too soft compositions, the dissolution of which is incomplete. Whereas under the same conditions, instant free drug particles of the active compound result in complete and rapid dissolution and improved bioavailability, which is unexpected over the prior art teachings because the art of record does not suggest free drug particles of the instant active agent i.e., drug particles without absorption of drug on to a carrier in a formulation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
